Monday 7th

Dear Mr. Watson

Your aid may be invoked in the distribution of the Emphasis book.

I have suggested to Putt copies on sale with Trübner, Luzac & Nutt, Leipsic, and that the copies sent Mr. Shaw presents should (on a list I have given) be sent to those two places.

I have made no arrangement about sale of Shaw American copies.

Release will communicate with you. It might be sent by him — and some on sale here with publishers, booksellers, Edwin. — & Bowes to give much trouble I do not think I suggest price to you. Mine is actual cost Mr. copies $12. publishes five booksellers $2. as above.

2

Of other Gamopetalæ (which I have not visited since writing you) there is nothing important to note as affects Palmer's coll. — except this,

Convolvulus arvensis Hook
C — & macranthus

I thought Chris & I had transposed the proper names of Kunth — I neglected to refer here to the Proc. — Suppose it was that

C. arvensis Hook. has the glabrous cordate and obtuse or hardly acute leaves.

C. macranthus, i.e. Spruce's macrantha has cordate tomentose outside, longer acute leaves. It is the C. cneorides. Pall. Ros

---

To-morrow is Sunday. I shall not go to India des Plantes on Monday, but attend to business. In afternoon we go to Rouen, & join the Hookers for a little tour in Normandy. Return back here.

The last news we had was of 24th ult. from Alice. Hoping you are all well. I am Sincerely Yours

A Gray
